

# To The Forgotten Man The Taxpayer The Home Owner The Parents

---

The most urgent concern of the Forgotten Man is his Economic Security.

We hear a lot from Old Line Parties of Reform for the good of the people and country. Before every election they hand us the same line they claim their partners in exploitation, but opponents for office, handed us two, three or five years before and failed in—and when they have gulled us into voting them into power again, with contempt they hand us the same old bunk. Let us show these professional and lawyer politicians that we have no faith in their promises of reform and progress, and that we see them for the schemers they are—no different from a fishing party lining up the bait for the catch on August 22nd.

By voting against the Old Line Parties and Selfish Interest you vote for Economic Freedom—you vote for Freedom from the thrall of Finance Companies, the agents of International Finance—you vote for the liquidation of your mortgage through an interest-free loan from the Province, payable as your circumstances permit.

In this campaign a lot has been said about doing something for YOUTH. What has the Old Line Parties and Selfish Interests done for youth? They have tried to school them in political camouflage with all its selfish ramifications. The main question with these Political Humbugs is whether the children can still be educated to follow in their footsteps—their main fear is that the children may receive some economic instruction which will cause them to revolt and destroy the present corrupt system, with its relief camps and such other degrading contraptions as they may devise.

Now the Old Line Parties have always had a monopoly on legislation. Do you want them to sink us deeper into confusion and despair?

Do you parents want your children to be smirched with the political muck raked up by the professional politician?

Do you want your young man on the rock pile and your young woman without hope? No! Then wake up on August 22nd.
